PARCEL SHIPPING SCALES

Weighing Solutions for the World Since 1830

Factory calibration!

Fairbanks.com

The Ultegra® Max Parcel Shipping Scale has the rugged construction and legendary accuracy of Fairbanks' standard Ultegra model, but features a larger platform and greater capacity. Like the standard Ultegra, the Ultegra Max also features an integral display, is available in a flat top or roller top design and, while most frequently used in shipping operations, is a good fit in various manufacturing applications.

MAXIMUM CAPACITY

The Ultegra Max is Fairbanks Scales' highest capacity desktop shipping scale. It can weigh packages up to 250 pounds and features 0.05 pound increments for razor-sharp accuracy.

MAXIMUM PLATFORM SIZE

The Ultegra Max features a 21" x 21" platform to better accommodate large, odd-shaped, and over-sized packages.

MAXIMUM CONNECTIVITY

Today's computers interface peripheral devices via a USB connect, so the Ultegra Max features USB output for easy plug and play integration.

Optional remote display and pillar stand.

UPS SOFTWARE COMPATIBLE

Ultegra Max scales are ideal in demanding UPS shipping applications. All that is needed is a Windows®-based computer and UPS software (available exclusively from UPS). Ultegra Max scales are also compatible with a variety of other shipping software applications.

SPECIFICATIONS

Capacity	250 lbs (113 kg)
Division size	0.05 lbs (0.02 kg)
Platform size	21" x 21" x 2.5" (Flat top model) 21" x 21" x 3.5" (Roller top model)
