AEGIS LAUNDRY CART SCALE

Laundry operations run on precision — and the Aegis Laundry Cart Scale was engineered from the ground up to deliver exactly that. Purpose-built for high-throughput commercial and institutional environments, the Aegis scale brings industrial-grade accuracy directly to the floor, where it matters most. With a robust 2,000 lb capacity, a low-profile platform, and load cells built from 17-4 PH stainless steel, this is not an adapted general-purpose scale. It is a laundry tool, designed and built to the exacting demands of laundry professionals.

When paired with the optional FB1200 indicator and checkweighing light kit, the Aegis becomes a complete load management system. Operators no longer rely on guesswork or estimation — the system communicates directly and instantly: load the cart, and when the green light illuminates, the washer or dryer receives exactly the right amount. Optimal loads protect equipment, reduce energy and water consumption, and extend the working life of expensive machines. The result is a measurable improvement in throughput, resource efficiency, and long-term cost control. While the kit offers a convenient all-in-one solution, the laundry cart scale is compatible with any analog instrument.

APPLICATIONS

- Commercial & Industrial Laundry
- Healthcare (Hospitals, Clinics, Nursing Homes)
- Hospitality (Hotels & Resorts)
- Correctional Institutions
- Military Bases
- Food Service & Industrial Uniform Providers
- Garment Rental & Uniform Services

FEATURES

- Wheel capture stops lock the cart in place the moment it rolls onto the platform, preventing shifting during weighing.
- Slight rear incline uses gravity to hold the cart against the back stop, eliminating unwanted roll-offs.
- Backstop and side rails ensure the laundry cart stays securely on the scale throughout the weighing cycle.
- Low 1.5" platform height makes loading and unloading fast and ergonomic for operators.
- IP67-rated 17-4 PH stainless steel load cells deliver accurate, reliable readings in demanding environments.

SPECIFICATIONS

PLATFORM

Platform Size.....	26" x 42"
Overall Dimensions.....	32" x 42"
Scale Height (with Side Rails).....	3"
Platform Height.....	1.5"
Construction.....	Mild Steel
Finish.....	Black Powder Coat
Capacity.....	2,000 lbs.
Division Size.....	0.5 lbs.
End Loading.....	100%
Cable.....	30 ft, PVC Jacketing
Approval	NTEP CC: 08-044

LOAD CELLS

Resolution.....	5,000d
Protection Rating.....	IP67
Construction.....	17-4 PH Stainless Steel
Rated Output.....	2 mV/V $\pm$ 0.002 FS
Bridge Resistance.....	1,000 $\pm$ 1 ohm
Ultimate Overload.....	300%
Side Load.....	100%

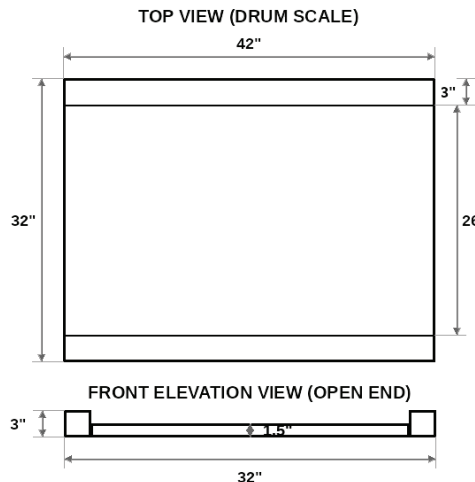

Load Cell Approval.....NTEP CC: 06-065

OPTIONAL RAMP KIT

Size.....	26"x4"
Construction.....	Mild Steel
Finish.....	Safety Yellow Powder Coating

Note: Ramp includes integrated bolt-down plates and two bolts.

DIMENSIONS

OPTIONAL FB1200 CHECKWEIGH LIGHT KIT

The optional FB1200 Instrument and Checkweigh Light Kit adds a simple but powerful layer of operational control to the Aegis Laundry Cart Scale. Designed for fast-paced laundry environments, the kit provides immediate visual feedback during loading, allowing operators to hit target weights without stopping to interpret readings or rely on judgment. The bright green, intuitive light indicator streamlines training, reduces variability between users, and helps ensure every cart is consistently prepared for efficient wash and dry cycles. By turning weight verification into a clear visual cue at the point of use, the kit supports tighter process control and smoother overall workflow integration in high-volume laundry operations.
