---

**SPECIFICATIONS**

- **Capacities:** 30 ton to 120 ton
- **CLC:** 60 k and 80 k
- **Platform sizes:**
  - **Lengths:** 24’ to 80’ standard
  - **Widths:** 10’ to 14’ standard
- **Minimum division size:** 20 lbs
- **Sections:** 2 to 5
- **Foundation:** P-type
- **Weightbridge data:**
  - **Design:** Dual I-beam
  - **Construction:** Field pour
  - **Lever type:** Cast iron with removable pivots
  - **Deck thickness:** 6”
  - **Checking:** Bumper
  - **Suspension:** Parallel link
- **Approvals:** NTEP CC# 88-154

**ACCESSORIES**

- Scale Instruments
- Traffic Signals
- Custom software
- Remote Displays
- Ticket printers
- Driver Assist Terminals

**OPTIONS**

- Custom sizes
- Dump through deck
- Galvanized weighbridge
- Guide post kits
- Intrinsically safe electronics
- Manholes (round)
- Side checking
- Steel deck
- Tension load cell isolation kits

---

**GUARANTEED QUALITY, ASSURED BY 15-YEAR WARRANTY**

Fairbanks has provided customers with “Type S” scales since the early 1900s. Our confidence in this product is demonstrated by a 15-year Warranty offered on all Endurocast levers. Reference warranty statement 101855 for details.

What makes Fairbanks’ “Type S” the premier industry pit-type truck scale?

**LEGENDARY**

More than 40,000 installed units worldwide and original equipment that has continued to perform through four generations are two of the powerful reasons why Fairbanks’ “Type S” Pit-type Truck Scales are legendary in the weighing industry. Unmatched reliability, accuracy, and dependability make this scale an industry standard. To prove that point, Fairbanks’ “Type S” scales are the heavy-capacity mechanical scale of choice and are still used in state government metrology labs and some railroad master scale programs.

**DURABLE & RELIABLE**

Legenday truck scales don’t become legendary overnight. Decades of durable and reliable performance under heavy, frequent loads and in harsh environments have tested and affirmed the legacy of the “Type S.” Experience, forethought, engineering and design all serve as the foundation for its success. As a result, this scale design has stood the test of time while establishing itself as the standard in mechanical pit-type scales.

**ACCURATE**

Unmatched “Type S” accuracy is derived from one of Fairbanks’ hallmarks — our heritage of quality hand craftsmanship. This remarkable scale owes its ability to consistently provide accurate weighments through decades of punishing use to the talent and skill of experienced scale makers at Fairbanks’ U.S. manufacturing facility.

**HOW PARALLEL LINK SUSPENSION HANDLES TRUCK SCALE SHOCKS AND JOLTS**

Fairbanks’ Parallel Link Suspension System reduces critical component wear and protects against the stresses of side load shocks.

The system’s load pivots and bearings run parallel to the direction of traffic, dramatically reducing pivot and bearing wear.

**LEGENDARY FEATURES**

- Massive, load-bearing, structural steel girders.
- Titanium added to cast iron levers to increase scale strength and endurance.
- Axle load models made for sites where real estate limitations prevent “full-length scale” installation.
- Built to withstand the punishment of heavy loads without ever compromising reliability.

**CAST IRON DOUBLE WEB LEVERS**

Cast iron levers with titanium, used in the “Type S” design, provide the strength and resistance to bending and torsion that no fabricated lever can.

**ACCURATE**

Made of high-carbon steel and heat-treated for extra strength, this scale’s precision pivots are supported, over their entire length, by self-aligning bearings. This unique design helps eliminate stress and prolongs the life of the scale. The open design of the “Type S” lever allows easy access to all pivots and bearings when routine maintenance is required.

**PRECISION PIVOTS AND BEARINGS**
