## QUICKBOOKS® SYNC MODULE FOR INTERACT SE AND PROFESSIONAL

Fairbanks' InterAct Software customers can eliminate hand entering of scale ticket data and other expensive, labor intensive accounting practices with a new software module designed to sync Interact Software data with QuickBooks® Pro.

### A QUICK WAY TO STREAMLINE SMALL BUSINESS ACCOUNTING

The Interact QuickBooks Sync Module is specifically designed to synchronize operational data (such as information related to customer accounts, hauling and material costs, and taxes) with QuickBooks Pro — the number one rated and recommended small business financial management software.

The Interact QuickBooks Sync Module will quickly and easily transfer the quantity and charge calculation values to QuickBooks Pro to allow QuickBooks Pro to calculate the rate. This is possible even when using Interact's multiple price table structure and special item job pricing.

### CASH OR CHARGE

The Interact QuickBooks Sync Module easily processes all transactions, whether cash or charge. Users can feel confident that their Interact QuickBooks Sync Module can handle all charge transaction types.

### TRUE SYNCHRONIZATION

Unlike other applications that merely export a simple text file, the Interact QuickBooks Sync Module offers true synchronization functions. Synchronized items include:

- Customer Account Table.
- Hauler Table
- Material (product) Table
- Tax Table

### TRANSACTION DATA TRANSFER

The Interact QuickBooks Sync Module accurately transfers the following posted transaction data from Interact to QuickBooks Pro:

- Account name
- Unit of measure
- Invoice number
- Transaction date
- Ticket number
- Item/material code
- Base charge
- Tax
- Freight charges
- Transfer date
- Quantity (unit count, net weight, yards)

### REQUIREMENTS

Software . . . . . Interact SE or  
Interact Professional;  
QuickBooks® Pro

*Note: QuickBooks Pro performs calculations that carry out to five decimal places.*
