SIGNATURE CAPTURE MODULE FOR INTERACT SE AND INTERACT PRO

Fairbanks' Signature Capture Module for Interact provides the necessary customer acknowledgement demanded in many business transactions today. It also allows the captured signature to be displayed on the weigh screen and printed on the transaction ticket.

The captured signature is stored as part of the transaction. Should you ever need to recall and reprint a transaction, the QuickScan feature in Interact makes the ticket recall fast and easy. No need to sort through archived paper ticket copies to find it. Sort by Customer, Date Range, Job ID, Hauler, etc. With the Signature Capture Module, an electronic signature can be recalled and reprinted in a fraction of the time it takes to perform the same task manually.

SIGNATURE MODULE FEATURES

- Works with Interact SE and Professional.
- Printable captured signature (requires compatible printer).
- Signature displayed on weigh screen.
- Programmable Welcome message — 10 lines, 32 characters per line.
- Programmable Thank You message — 10 lines, 32 characters per line.
