HGM SERIES HANGING SCALES

The HGM Series are general purpose, non-commercial hanging scales ideal for use in produce weighing, hardware and general purpose industrial weighing applications.

EASY TO USE

The HGM Series hanging scales are designed to be lightweight, yet durable. These scales feature a cast aluminum alloy housing, as well as a rotation dial protected by a clear plastic lens so there is always a clear view of the weight readings.

The HGM Series 25 pound capacity is the only model available in this line of scales that has double-sided viewing and a removable stainless steel weighing pan. The HGM Series models with capacity of 60 pounds or more, include a hook and shackle for accurate weighing.

SIMPLE, YET ACCURATE

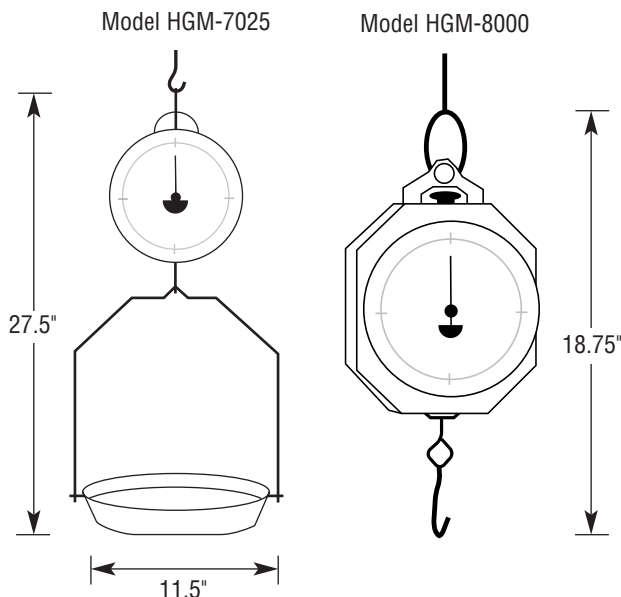

With capacities ranging from 25 to 400 lbs, this line of hanging scales features a thumb screw zero adjustment. The rotation dials on all scale models have large, easy-to-read numbers and graduations for greater weighing accuracy.

These hanging scales are so easy to use that you can take them right out of the box, hang them up and you're ready to start weighing.
